Former Yugoslav Republic of Macedonia

We want to go back when remembering pleasant moments in this beautiful, small country with kind people...

This three-year project has been initiated during difficult period in Macedonian history – in 2001. The target of this project was to assist local company active in the field of pollution prevention in initial phases of know-how building. We work jointly with consultants from this company for example in aluminium plant, food company, hospital and machinery company producing concrete rods.

Supported by the Ministry of Environment of
the Czech Republic within the Official
Development Assistance
